

Size Guide Forest Clothing and Boots

Husqvarna®

Use Your body measurements and check against the table to find the right size for You.

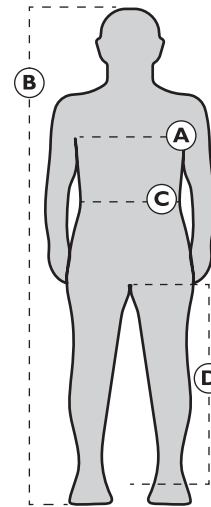

Note! All measurements are body measurements except the inner leg measurement that refers to the garment measurement. If a base layer is to be worn under the garment it should also be worn when measuring.

When purchasing jackets, use the first table and measurement A.
For waist trousers use the second table and measurements B, C, D.
For carpenter trousers use the third table and measurements B, C, D.

The clothing will fit different on You dependent on what model You buy. Classic and Functional has a regular fit, Technical has a tight fit and Technical Extreme has a slim fit. Additionally, Technical waist trousers are available with longer legs and Technical carpenter trousers are available with shorter legs.

In general, our carpenter trousers have a wider fit than our waist trousers.

We recommend you to always try the garment on to ensure the best fit.

A = Chest. Measure around the widest part of the chest
B = Total Height.
C = Waist. Measure around the waist.
D = Inside leg. Measure from crotch to desired length of trouser.
All measures are in centimeters.
